Providing Capabilities and Expertise for IUID Compliance

**Industrial Business Operations Direction, NAVAIR 6.1.1, FRC
Southeast**

FRC Mission

- To produce quality airframes, engines, components, and support equipment, and provide maintenance and production support with logistics and engineering services *to meet Naval Aviation Enterprise (NAE) readiness requirements at improved efficiency and reduced cost.*
- This includes supporting improved business processes and initiatives such as IUID and SIM.
- Taken together, IUID and SIM can provide significant future savings in both time, money, and optimized use of assets.

Many Opportunities for Legacy Marking!

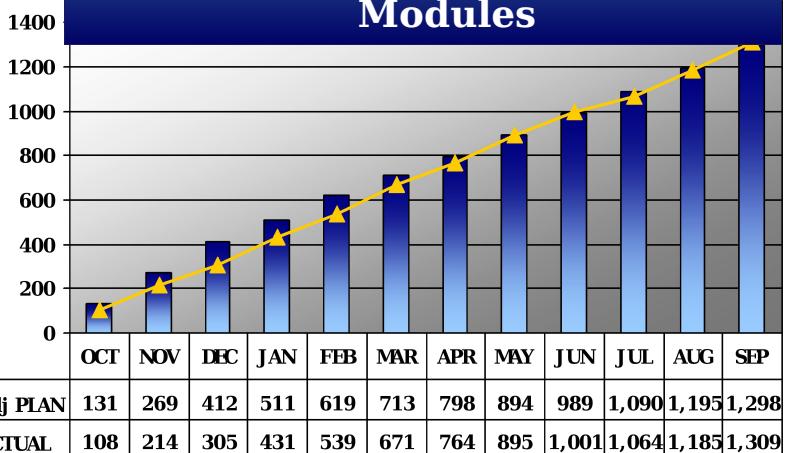

Level 3 (Depot) Airframes

Level 3 (Depot) Components

Level 3 (Depot) Engines & Modules

Level 2 (Intermediate) Production

- 6,000 Engine, Module & accessory repairs per year
- 580,000 airframe & avionics component repairs per year
- Ground Support Equipment for squadrons & air stations

FRC IUID Stand-up

- **Supports OSD emphasis for IUID-based nameplate capability at depots**
- **FRC East; UID marking and registration of APUs with a UID Registry interface, commencing H-1 IUID items**
- **FRC Southeast & FRC Support Equipment; UID marking and asset management of plant property**
- **FY09/10 deployment of marking carts to FRCs**

Investing in skill sets and infrastructure.

IUID Marking Capability

- Metal & adhesive labels with verification
- Generates data files for UID Registry submission
- Outfitting:
 - FRC East - **Complete**
 - FRC Southeast - **Complete**
 - FRC Southwest - **Aug 2009**
 - FRC Support Equipment - **Q1 FY10**

Site IOC for select product lines

FRC Approach to Tech Data

- **LES/LPS used in lieu of individual drawing changes**
- **Platform-specific LES/LPS developed by ISSC**
- **Suite of LES/LPS reflect appropriate marking methods**
- **A single LES/LPS may link to multiple drawings**
- **LES/LPS provides detailed IUID marking procedures**

Implementation with lower
cost

Sample LES/LPS Content

- Denotes maintenance work order event
- Specifies special tools and media
- Cites associated drawings, part numbers & rework procedures
- Provides inspection criteria
- Defines mark creation & placement
- Provisions for verification & registration

LES/LPS Substitutes for
Multiple Drawing
Changes

Depots Need PMs To ...

- ... collaborate with the Engineering Staff and Field Support teams for IUID requirements, planning & strategy
- ... identify which parts are to be marked
- ... determine the schedule for commencing parts marking of your “marking trigger” for IUID, but you’re the “demand trigger!”
